PROFESSIONAL SUMMARY

Data Analytics graduate with practical experience in SQL, Python, Power BI, Tableau, and Excel.

Skilled in data cleaning, transformation, exploratory data analysis, dashboard development, reporting, and business intelligence.

Experienced in building data-driven solutions that convert complex datasets into actionable insights for decision-making.

Strong analytical and problem-solving abilities with a passion for uncovering trends, improving reporting processes, and supporting business performance through data.

EDUCATION

EDUVOS Bachelor of Science Honours in Information Technology (Data Science)	2026
Richfield Graduate Institute of Technology Bachelor of Science in Information Technology	2025
Academy Training Group NQF level 5 in Assessor Certificate	2022
Royal Schools of Alberton National Senior Certificate (Bachelor pass)	2019

CERTIFICATIONS

Salesforce Salesforce Certified Agentforce Specialist	2025
---	------

EXPERIENCE

Believers Care Society <i>Administrative Support Volunteer</i>	July 2022 – August 2022
- Maintained and organised records, ensuring data accuracy and completeness. - Assisted with document validation, record management, and information tracking. - Supported examination and administrative processes while ensuring compliance and operational efficiency.	

Reason for leaving: End of contract

PERSONAL PROJECT

- **Portfolio**

<https://sthephiwe-portfolio.netlify.app/>

Personal data analytics portfolio showcasing end-to-end data analysis projects, technical skills, and academic background in Data Science.

- **Project 1: Blood donor availability analysis**

Tools: Python, Pandas, Matplotlib

- Cleaned and analysed blood donor data using Python, Pandas, and Matplotlib.
- Performed exploratory data analysis to identify donation patterns, donor eligibility, and donation frequency trends.
- Created visualisations and generated insights that can help improve donor retention and support effective blood supply planning.

Portfolio: https://sthephiweportfolio.netlify.app/datasets/blood_donor

- **Project 2: Amazon Power BI**

Tools: Power BI

- Cleaned and transformed Amazon sales data using Power BI to improve data quality and reporting accuracy.
- Analysed revenue trends, customer purchasing behaviour, and product category performance through interactive dashboards and visualisations.
- Generated insights on top-performing products, customer buying patterns, and sales trends to support data-driven business decisions.

Portfolio: <https://sthephiwe-portfolio.netlify.app/amazon%20pbi>

- **Project 3: FIFA World Cup**

Tools: Python, Pandas, Matplotlib

- Cleaned and analysed historical FIFA World Cup datasets using Python, Pandas, and Matplotlib.
- Conducted exploratory and statistical analysis to identify trends in goals scored, team performance, and tournament progression.
- Created visualisations and generated insights on long-term team performance and historical World Cup trends.

Portfolio: <https://sthephiwe-portfolio.netlify.app/datasets/fifa>

- **Project 4: Financial Transactions & Customer Analysis**

Tools: PostgreSQL, pgAdmin 4, SQL

- Cleaned and analysed over 13.3 million financial transactions using PostgreSQL.
- Performed data quality checks for duplicates, missing values, transaction errors, and merchant location data.
- Used JOINS, CASE statements, aggregate functions, GROUP BY, HAVING, and a CTE to analyse customer, card, and transaction data.
- Analysed transaction behaviour and error rates, identifying online transactions as having the highest error rate at 2.28%.

CORE COMPETENCIES

- | | |
|------------------------------|---------------------------|
| • Data Analysis & Reporting | • Trend Analysis |
| • Dashboard Development | • Statistical Analysis |
| • Business Intelligence | • Data Storytelling |
| • Data Cleaning & Validation | • ETL Processes |
| • Data Transformation | • Problem Solving |
| • Data Visualization | • Critical Thinking |
| • KPI Reporting | • Data Quality Management |
| • Critical Thinking | |

TECHNICAL SKILLS

Programming Languages

- Python
- SQL
- R

Data Analytics & BI

- Power BI
- Tableau
- Microsoft Excel

Python Libraries

- Pandas
- NumPy
- Matplotlib
- Seaborn
- Scikit-learn
- PySpark

Database Technologies

- Relational Databases (MySQL, SQL Server, Postgres)
- SQL Querying
- Data Extraction

Data Engineering

- ETL
- Data Cleaning
- Data Preprocessing
- Data Transformation

Additional Technologies

- Git
- Hadoop

ADDITIONAL INFORMATION

- South African Citizen
- Available Immediately
- Valid Driver's License (Code B)
